

Intelagrid® Software Solutions

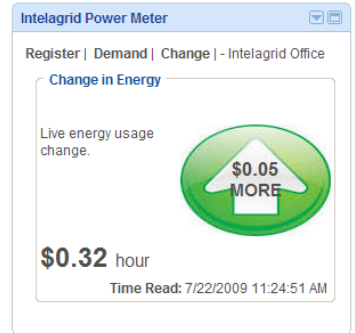

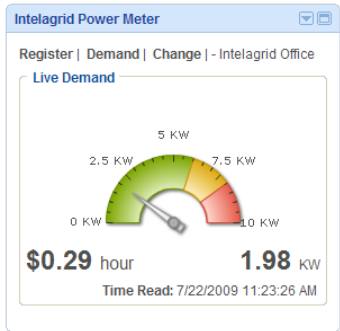

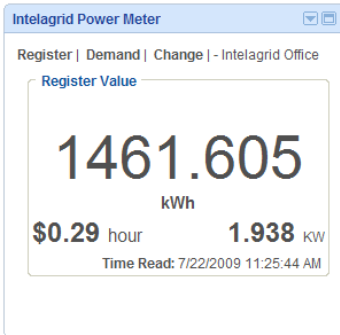

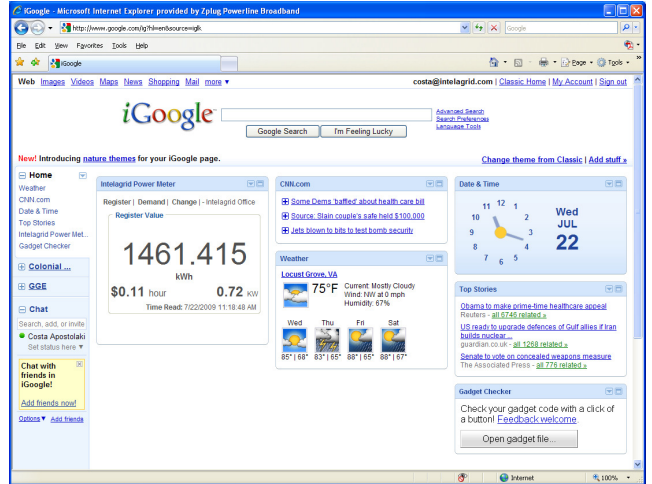

Power Meter Gadget Google Power Meter

Intelagrid's Power Meter Gadget provides consumers with real time and historical energy usage. When Customers visit their personalized iGoogle homepage, they will be able to see detailed information on their personal electricity, water and gas usage. The Power Meter Gadget provides a real time energy feed that will display changes in energy in 10 second increments which will allow consumers to have up to the

second infor-
mation about

how they use energy and what they can do to be more efficient. The Intelagrid Power Meter is available to consumers where their Utility has deployed Intelagrid's intelaMeter products. The Power Meter Gadget is compatible with electric, water and gas meter data. The Power Meter Gadget will help customers find ways to reduce their energy bills and carbon footprint by making smart decisions about energy use. Studies show that access to personal energy information can help people save between 5% and 15%. Additionally Intelagrid's Power Meter Gadget provides smart home functionality by allowing consumers to control devices in their home i.e. lights, thermostats, and other smart home products that are compatible with Intelagrid.
