FOR IMMEDIATE RELEASE

Intelagrid appoints Industry Veteran to Lead Development Team

New software executive joins company's management team

Locust Grove, VA. July 7, 2010 -Intelagrid, LLC, the leading provider of standards-based smart grid solutions, today announced that Shawn Gunsolley has joined its management team as Director of Application Development. Shawn has served in technical and management positions as a consultant for over 10 years, including two leading technology solution providers where he served major smart grid, telecommunications, banking, and government clients.

"Shawn is an expert in building scalable, maintainable solutions for Fortune 100 companies, federal government agencies, and leading energy companies with some of the most stringent security and scalability requirements on the planet", said John Espey, COO of Intelagrid. "Our customers and prospects view our software offering as a key differentiator, and an industry veteran with Shawn's experience is a major addition to our team."

Mr. Gunsolley will be responsible for driving the technical direction of Intelagrid's products and solutions, for managing the growing software development team, and for working with customers to build upon the industry's first truly real time, 100% standards-based smart grid solution. He will work out of the company's Charlotte, NC location.

About Intelagrid

As the leader in broadband standards-based smart grid and smart home products, Intelagrid enables utilities to deploy a scalable, reliable and secure infrastructure for advanced metering and real time monitoring. By deploying a broadband shared network infrastructure, utilities can implement multiple services including advanced metering, distribution automation, demand response, smart home and other applications at a fraction of comparable costs. Building an intelligent smart grid lowers capital costs and provides a future proof network that will save energy and operating costs. When planning the intelligent smart grid of tomorrow, partner with a company that makes it available today. For more information, visit: www.intelagrid.com.
